PROFESSIONAL SUMMARY

Full-Stack Web Developer with 3+ years of experience delivering scalable, production-ready web applications and APIs. I specialize in React front-ends, Java/Spring Boot back-ends, and CI/CD automation — handling the full development lifecycle from architecture to deployment. I currently co-develop an enterprise ticketing platform and build Oracle APEX applications with integrated AI assistants, and previously built and maintained mission-critical Java systems for a global semiconductor leader. Available for freelance and contract projects worldwide, with a strong focus on clean code, on-time delivery, and transparent communication.

WHAT I CAN BUILD FOR YOU

- **E-Commerce Storefronts** — Shopify (custom Liquid sections, theme work, Admin GraphQL API) and custom-coded Next.js/React shops, conversion-focused and mobile-first
- **Full-Stack Web Applications** — React UI + Java/Spring Boot or Node.js API + database integration, end-to-end
- **REST APIs & Microservices** — Scalable, well-documented API design using Spring Boot and Zuul Proxy
- **Legacy System Modernization** — Upgrade outdated stacks with minimal disruption to existing operations
- **CI/CD Pipeline Setup** — Jenkins, Docker, Jib, Bitbucket Pipelines, and Artifactory for automated deployments
- **Front-End Development** — Responsive, user-friendly UIs with React, JavaScript (ES6+), HTML5, and CSS3

TECH STACK

Front-End: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

E-Commerce: Shopify (Liquid, theme customization, Admin GraphQL API), Vercel deployments

Back-End: Java 8–21, Spring Boot, Node.js, Python, REST API, Microservices, Zuul Proxy

Low-Code / DB: Oracle APEX, Oracle Database, PL/SQL

DevOps & Tools: Docker, Jib, Jenkins, Bitbucket, GitHub, Artifactory, CI/CD Pipelines, OCI, JIRA, Confluence

Infrastructure: Linux, UNIX, Windows, Apache HTTP Server

WORK EXPERIENCE

App Dev Senior Analyst — Accenture

02/2026 – Present | Full-Time

- Co-develop an enterprise ticketing/SLA management platform — Vite + React SPA front end with a Java 21 / Spring Boot 3.5 backend on Oracle Database, modernizing a legacy stack via a strangler-fig migration
- Built the platform's CI/CD pipeline: push-to-deploy container builds with Jib published to Oracle Cloud Infrastructure Registry (OCIR)
- Develop and extend enterprise Oracle APEX applications for large-scale data migration — PL/SQL packages, page components, dynamic actions, and custom JavaScript/CSS UI
- Integrated an LLM-powered AI chat assistant (tool-calling agent with streaming responses) directly into the APEX front end, re-platforming the chatbot backend onto a modern LLM API

Application Developer — Texas Instruments Philippines, Inc.

09/2022 – 04/2024 | Full-Time

- Built and maintained 3 mission-critical Java applications supporting global semiconductor manufacturing operations
- Delivered full CI/CD infrastructure using Bitbucket, Jenkins, Artifactory, and Docker — enabling automated, zero-downtime deployments for web apps, APIs, and microservices
- Led React/Node.js front-end development to modernize a legacy equipment monitoring system, upgrading from outdated JDK and JMS to the latest stack with no production disruption
- Improved application features, resolved bugs, and optimized performance, reliability, and scalability across the full stack
- Executed end-to-end migration of Java applications and Oracle databases to upgraded systems, ensuring smooth transitions

Quality & Testing Engineer — Texas Instruments Philippines, Inc.

04/2024 – 02/2025 | Full-Time

- Applied engineering discipline to semiconductor device testing — validated functionality, performance, and reliability against production quality standards
- Bridged engineering and production planning teams, gathering requirements and ensuring clean technical handoffs

INTERNSHIP EXPERIENCE

Application Developer Intern — Accenture

06/2021 – 08/2021

- Built Oracle Digital Assistant chatbot solutions under Oracle Cloud CX, integrated with custom ReactJS front-end forms to enhance user engagement
- Worked in an Agile team and delivered functional chatbot flows within a 3-month cycle

QA Tester Intern — Medisource Healthcare Systems Inc.

12/2017 – 01/2018

- Tested and validated portal functionality and UX for a healthcare web platform; identified and resolved issues to improve reliability

EDUCATION

Bachelor of Science in Computer Science — Saint Louis University, Baguio City

08/2018 – 06/2022

CERTIFICATIONS

- Oracle APEX Developer Professional (2025) — Oracle University
- OCI Generative AI Professional (2025) — Oracle University
- OCI AI Foundations Associate (2025) — Oracle University
- React — The Complete Guide (Hooks, React Router, Redux) — Udemy
- Spring Boot 2.0 Essential Training — LinkedIn Learning
